Wednesday Challenge Form

Group Members: Alvin, Sam, Logan, Michael

Problem Statement: Create a message and a method of communicating the message to extraterrestrial organisms.

Approach: Our idea was that we would have something similar to the rosetta stone, where we broadcasted a simple message such as “hello” in every method of communication possible such as in every language.

Solution: Keilah’s group won with their idea of making the message not dependent on a sense such as hearing or sight.

Lessons Learned: Just because we have a given sense, it doesn’t mean that other beings/organisms definitely have it as well.
